It started as just another assignment. Reporter Kimberly Wells (Jane Fonda) and cameraman Richard Adams (Michael Douglas) were covering the daily routine at a Los Angeles power plant when the unthinkable occurred: a nuclear incident that could have wiped out Southern California. And Richard thought: put it on tape. When their TV station refuses to air the footage, Wells and Adams recruit plant supervisor Jack Cadell (Jack Lemmon) to expose the terrifying truth: the plant is a ticking time bomb. But with millions of dollars at stake, company officials cannot let the story break. When the trio attempts to broadcast live from the plant control room, the utility company does everything to a power-plant Cadell permanently, as the world watches.
